

**Full display of programme n° 8 :**

> Accreditation - Page 1/9 - General presentation

**:: Identification data :**

Dr ZOLTAN Denes  
Position : head of the unit  
Phone : 36 30 270 75 65  
Email : z.denes@rehabint.hu

Years certification : 2006, No: 1935

Name of unit : Brain Injury Rehabilitation Unit  
Hospital or other facility : National Institute for Medical Rehabilitation  
Address : Szanatorium utca  
Postal Code : 1528  
City : Budapest  
Country : Hungary,

**:: Title of the programme of care :**

07. PRM and patients with neurological disorders

**:: Description of the programme :**

Target population: Patients with brain injury (mainly traumatic origin)  
Aims and goals: multidisciplinary rehabilitation of patients  
Procedures: physiotherapy, occupational therapy, psychology, neuropsychology, speech therapy (afasia and dysarthria,swallowing problems) nutritional therapy, sporttherapy, orthetica,hydrotherapy,  
- The unit delivering the programme  
- Location: unit of the national rehabilitation institute  
-- Means devoted to the programme  
-- Safety and patient rights: informed consens for treatment and other activities,  
-- Patient rights  
- The PRM specialist in the programme: PRM doctor is the leader of the R. team

**:: This programme is applying for :**

**:: Referral of patients** (choose one or several) :

Direct access No

Referred from a general practitioner Yes

Referred from a specialist Yes

Referred from a specialist in PRM Yes

### ⌘ Setting :

Part of a university or national hospital

### ⌘ Approach :

multiprofessional

### ⌘ Stage of recovery :

Within two weeks of onset No

2 weeks to 3 months after onset Yes

3 months or longer after onset Yes

### ⌘ Type :

Inpatients in beds under PRM responsibility Yes

Inpatients in beds belonging to other departments No

Day programme (most of the day in outpatient setting, not home) No

Outpatient clinic (assessment and/or treatment, for up to 3 hours/day) No

Community-based (in the patient's home or workplace or other relevant community location, e.g. sports centre) No

### ⌘ Targets of the programme :

● Which impairments does your programme focus on? See "limitations of body function or body structure :

s110, s198, s710, s720, s730, s740, s750, s760, s120,

● Which activity limitations does your programme focus on?

b140, b144, b147, b730, b760, b770, b510, b710, b735, b620,

● Which participation restrictions does your programme focus on?

d230, d310, d330, d410, d445, d450, d465, d530, d540, d550,

> Accreditation - Page 3/9 - Location and safety

**⚡ Does your programme have a designated and accessible space ?**

- For assessments and consultations ? Yes
- For an ambulatory or day care programme ? Yes
  - For inpatient beds ? Yes
  - For therapeutic exercises ? Yes
- For training in independence and daily living Yes
- For vocational and/or recreational activities ? No

**⚡ The safety concerns of persons in your unit programmes relate to :**

- Emergencies (fire, assault, escape) Yes
  - Medical emergencies Yes
    - Equipment No
  - Handling of materials No
  - Transports No

**⚡ The safety of persons in the programmes of your unit is provided by :**

- Written standards from National Safety Bodies No
- Written standards from National Medical Bodies No
  - Unit-specific written rules Yes

**⚡ Periodic inspection :**

- Internal Yes
- External No

> Accreditation - Page 4/9 - Patient rights

**⚡ Has your programme adopted a formal policy or statement of patients' rights?**

Yes

**⌘ Does this statement specify the influence that the patient should have in the formulation and implementation of the programme?**

Yes

**⌘ Is the statement known to all personnel involved in delivering the programme ?**

Yes

- This is checked periodically ? Yes

**⌘ Is the statement made known to and is available to all persons visiting your unit ?**

Yes

**⌘ Give at least one example of NGO activities for disabled people that staff from the programme participates in (or will participate in) :**

**> Last year :**

helper activities

transportation helping

**> This year :**

helper activities

transportation helping

> Accreditation - Page 6/9 - Team management in the programme

**⚡ Which rehabilitation professionals work on a regular basis (minimum of once every week) in your programme ?**

- Psychologists Yes
- Physiotherapists Yes
- Occupational therapists Yes
  - Social workers Yes
- Speech & Language therapists Yes
  - Vocational specialists Yes
  - Nurses Yes
- Orthotists/prosthetists assistive technicians/engineers Yes
- Other (please specify) No

**⚡ How often does your staff receive formal continuing education (mark as is) ?**

- in team rehabilitation :

every year

- in their own profession :

every second year

**⚡ Do team activities in your rehabilitation programme include the following ?**

- Is the patient at the centre of a multiprofessional approach ? Yes

- Do you always give informed choices of Yes  
treatment?
- Do you regularly promote family involvement ? Yes

**⚡ Does your organisation of multi professional team working include :**

- holding regular team meetings with patient's Yes  
records only  
(more than 2 members)
- holding regular team meetings (more than 2 Yes  
members)  
with the presence of the patients
- joint assessment of the patient or joint Yes  
intervention
- regular exchanges of information between team Yes  
members

> Accreditation - Page 8/9 - Monitoring and outcomes

**⚡ How many new patients (registered for the first time) are treated in your programme each year :**

300

**⚡ In your day care or inpatient programme :**

- What is the mean duration spent in therapy by patients on this programme 54 active days
- How many hours a day do the patients spend in therapy. 4 hours

**⚡ Give the mean duration of stay spent in the programme :**

54 days

**:: Does your programme have an overall monitoring system in addition to patient's records ?**

Yes

**:: Are the long term outcomes of patients who have completed your programme regularly monitored ?**

Yes

- Impairment (medical) outcomes : Yes
- Activity/Participation (ICF) outcomes : Yes
- Duration of follow up of the outcomes : 12 months

**:: Do you use your outcome data to bring about regular improvements in the quality of your programme's performance ?**

Yes

**:: Do you make the long term overall outcomes of your programme available to your patients or to the public ?**

Yes

[Top of the page](#)

> Accreditation - Page 9/9 - Audit spiral

**:: Which are the most positive points (strong points) of your programme ?**

multidisciplinary team work

**:: Which are the weak points of your programme ?**

substitution of specialists (neuropsychologist, speech therapist)  
financial problems,

**:: Which action plan are you setting up, in order to improve your programme ?**

continuing education
